Abstract of CN1178705

The health garment for newborn child can prevent infection, protect skin and resist disease. Honeysuckle taraxacum, Herba Violae, Radix Sophorae Flavescentis, Periostracum Cicadae and Radix isatidis in certain proportion are soaked and water decocted twice to obtain decoction; Fructus kochiae and Cnidium mormieri in the same ratio are crushed and extracted to obtain medicine liquid; the decoction and the medicine liquid are mixed, filtrate concentrated, alcohol extracted twice and filtered to obtain filtrate. Child garment as well as diaper and umbilical cord card produced with cotton cloth are sprayed with the said filtrate, stoved, packaged and disinfected to produce the said health garment.
